DEAR HIRING MANAGER

OCT 13, 2022

Dear ERP Hiring Manager,

I am applying to work with my newly acquired Web Development skills, and I am applying only because I believe I am uniquely suited to operate effectively as a front end developer at your company.

I just graduated University of Toronto Full Stack Coding Bootcamp and I'm eager to join the workforce and work on this passion of mine which is developing highly attractive, responsive websites from the ground up. I have spent the last year and a half working on upgrading my skills and am now ready to compete with the best.

I saw the job advertisement and thought to apply because the job description is a strong match for what I bring to the table: I'm a team worker, I write clear & concise code to generate beautiful user experiences & user interfaces, and functionality is one of my top priorities. Please check out some of my projects in the "my projects" section of my personal site.

Thank you for time & consideration

Sincerely,
Moshe Gadol
